

dear sirs,

I am a family physician in a small rural town in Texas. I just wanted to send a brief note to let you know what a tremendous help k-love radio (heard on a translator in our area) has been to us. we have a number of local am and fm stations that provide us with the farm reports and local happenings but we really have nothing to keep us in touch with the outside world except k-love. this station has met a significant need in our lives and I am especilly pleased with this station because it is so family-friendly and my children can listen without my having to constantly decrease the volume for objectionable material. Also it allows us to have somewhat of a connectednes to the outside world. I'm not sure I could continue to stay in this backwards town without the input of k-love! Thanks for your consideration.

Sincerely,

Darren E. Hamm, MD
